Workload Emissivity Effect on Heating in a Vacuum Furnace

Solar is always researching ways to improve the quality of the vacuum processing we provide. See the interesting results of our latest experiment. Black body materials will absorb heat faster than reflective colored materials. How does emissivity (based on the color and brightness of your parts) affect heating absorption rate and your ideal processing cycle? [Read more...](#)

D2P Greenville

Sept. 11-12, 2013
Greenville, SC
Booth TBD

ASM Heat Treat Expo

Sept. 11-12, 2013
Greenville, SC
Booth 1513

Sept. 25-26, 2013
Phoenixville, PA
Booth TBD

Solar Gets Heart Smart with CPR/AED Training

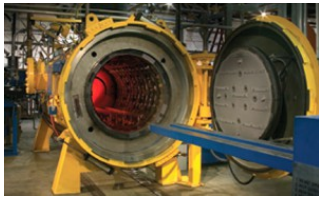

In support of corporate safety initiatives, Solar employees from both Eastern and Western PA recently completed CPR/AED (Automated External Defibrillator) training sessions. Attendees learned the most updated procedures for administering CPR to adults, children

and infants. They also gained hands-on practice on using an AED to restore a regular heart rhythm during sudden cardiac arrest. [Read more...](#)
